## ACTIVITY REPORT

JUNE 25, 2010

ACTIVITIES REPORTED THROUGH JUNE 23, 2010

PUBLIC INFORMATION OFFICE -- 703-246-2253

---

There are three sections in this report: Section I: MAJOR INCIDENTS; Section II: PROPERTY CRIMES; and, Section III: ANIMAL RELATED INCIDENTS. Sections are appropriately identified. Within the sections, incidents are organized by station, then by type of offense. They are listed alphabetically by street address.

Addresses shown indicate blocks and not specific locations. Thus an entry showing Chain Bridge Road 4100 would mean the 4100 *block* of Chain Bridge Road, not the address 4100 Chain Bridge Road.

An asterisk (\*) before an item indicates that a news release was distributed on that offense.

**ANIMAL CONTROL DIVISION**

**\*UPDATE: ANIMAL CRUELTY:** The poisonous substance believed to have caused the death of two dogs on May 26 around 5 p.m. has been identified as strychnine. Animal Control officers responded to a home in the 15100 block of Olddale Road in Centreville. It was reported that a

five-month-old Pit Bull puppy and an adult West Highland Terrier at a neighboring home had ingested a meatball tainted with an unidentified, toxic substance and became ill. Both dogs have since died. No strychnine pesticide products have been registered for use in Virginia since 1989. Prior to 1990 however, there were many rodent control products containing strychnine which were used widely. Anyone with information is asked to contact Crime Solvers by phone at 1-866-411-TIPS/8477, e-mail at [www.fairfaxcrimesolvers.org](http://www.fairfaxcrimesolvers.org) or text "TIP187" plus your message to CRIMES/274637 or call Fairfax County Police at 703-691-2131.

**\*DEER MANAGEMENT:** In an effort to assess the public's opinion on deer management in Fairfax County, a survey is now available at

<http://www.fairfaxcounty.gov/survey/deermanagement.htm>. Residents are encouraged to complete the survey concerning their thoughts and observations on the prevalence of deer, as well as ongoing and future attempts to address issues surrounding them. The survey will be posted until August 1, 2010. To learn more about deer management in Fairfax County, visit <http://www.fairfaxcounty.gov/living/animals/wildlife/management/deer-management.htm> or contact Fairfax County Wildlife Biologist Vicky Monroe at 703-324-0240.

**\*ANIMAL SAFETY AWARENESS:** Animal Control officers responded to a citizen's call on May 27 in Chantilly regarding an English bulldog that was in distress. The dog, estimated to be about 2 years old, was unresponsive. The dog was immediately rushed to a local animal hospital for treatment and was pronounced by the veterinarian to be dead upon arrival. The dog had no shelter and its water bowl was empty. High temperatures can cause heat stroke and even death among pets left outside or in cars exposed to the heat. The Fairfax County Animal Services Division recommends a climate controlled area for dogs to keep them out of extreme temperatures which can be dangerous during hot summer months. Virginia Code §3.2-6503 outlines minimum standards of animal care required of pet owners, which includes adequate water and shelter. On a hot day, leaving a pet outside without access to shade can be deadly. Even if water is left for an animal outdoors, an insufficient amount or lack of access to that water—which could be caused by a pet drinking all the water, knocking it over or not being able to reach it—may result in similar deadly consequences.

"Pets without adequate shelter or water cannot protect themselves from the elements," says Michael Lucas, Animal Control director. "Similarly, pets left in a car have no way to escape the heat. Even with the window cracked open, temperatures can soar leaving pets vulnerable and in a life-threatening situation." People who deprive their pet of necessary shelter and water and those who leave a pet in a car on a hot day could be prosecuted for a class 1 misdemeanor for animal cruelty under the Code of Virginia §3.2-6570. Animal Care Tips During Hot Summer Months:

- Keep your pet indoors in a climate-controlled area, especially when you are not at home.
- Make sure that pets have access to shelter and/or shade (whether indoors and outdoors).
- Provide plenty of fresh water of a "drinkable temperature."
- Never leave pets alone in a car without air conditioning. Even cars parked in the shade or in parking garages can reach soaring and potentially fatal temperatures for pets.
